

Worksheet 02 – Interface design in your first App

Task 1 (10 marks):

You are a mobile App developer. Before program the App "Button Pressing Speedtest (BPST Mobile)" in App Inventor 2, you should design 3 interfaces (Screen1, Game, Result) by

1. Sketching the layout and components on each screen.
2. Name the components on each screen.

The first screen (Screen1) is an example, please finish design the interfaces Game and Result.

You interface design:

Interface "Game" design

Interface "Result" design

--	--

Task 2 (5 marks):

In MIT App Inventor 2, finish the following steps:

- Step 1: Start a new project named "BPST_3E01". (Please use your own class and class number)
- Step 2: Use "Add Screen..." function to add 2 screens named "Game" and "Result".
- Step 3: In every screen, try adding components according to your design in Task 1.
- Step 4: Try to edit the "Properties" of every components.
- Step 5: Export your project to (.aia), and submit to the Schoology.
