Class no.	
Date	
Marks	/ 50

1. Write your Name, Class and Class Number in the boxes provided.
2. Follow the instructions below to finish the examination tasks.
3. **If you fail to upload your work, NO MARK will be given.**
4. Only open the link in Teams and the specified project in MIT App Inventor 2. **DO NOT** browse other websites or previous project assignments.

-
1. **ALL TASKS** should be finished in **MIT App Inventor 2**.
 2. Login to Teams and open a folder named “S3 Term 1 Practical Assessment”.
 3. Download the files “task1_2425.aia”, “task2_2425.aia” and “task3_2425.aia” to your computer.
 4. Submit your work to the appropriate assignments in Teams.

Task 1

(15 marks)

Figure 1 shows the interface of Task 1.

- (a) **Download** “task1_2425.aia” from Teams and **import** it into MIT App Inventor 2.
- (b) **Insert an ImageSprite** on the Canvas with the following properties:
 - Name: “balloon”
 - Width: 50px
 - Height: 70px
 - X: 135
 - Y: 150
 - Picture: “balloon.png”
- (c) Add the following blocks:
When ImageSprite “balloon” is being **touched**,
Move ImageSprite “balloon” **upward by 10 pixels**.
- (d) Add the following blocks:
When ImageSprite “balloon” **reached the edge**,
Change the picture of ImageSprite to “balloon_break.png”.
- (e) **Export** “task1_2425.aia” and **submit** it to Teams.

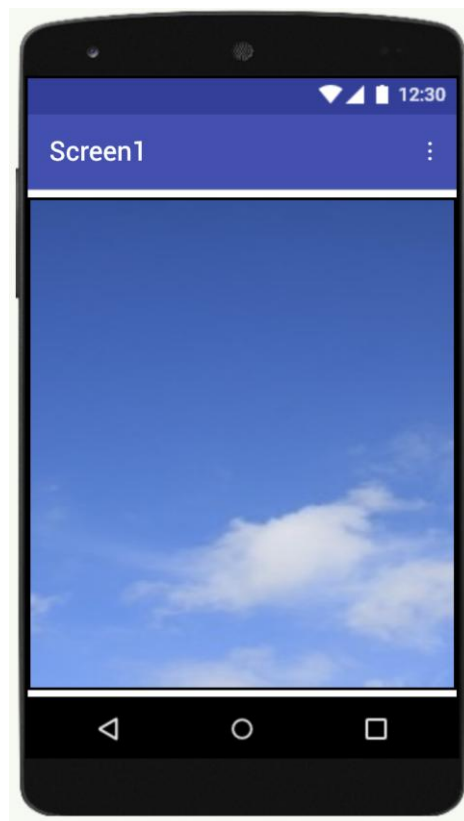

Figure 1

Task 2

(15 marks)

Figure 2 shows the interface of Task 2.

(a) **Download** “task2_2425.aia” from Teams and **import** it into MIT App Inventor 2.

(b) Add the following blocks:

When Screen1 is being **initialized**

Change the heading of Ball "movingBall" to a **random integer** between 0 to 360.

Change the speed of Ball "movingBall" to a **random integer** between 5 to 15.

(c) Add the following blocks:

When the Ball "movingBall" **reaches the edge**

Ball "movingBall" **bounces** off the edge.

(d) Add the following blocks:

When the ImageSprite "player" is being **dragged**

Move ImageSprite "player" to the **current** touched position.

(e) **Export** “task2_2425.aia” and **submit** it to Teams.

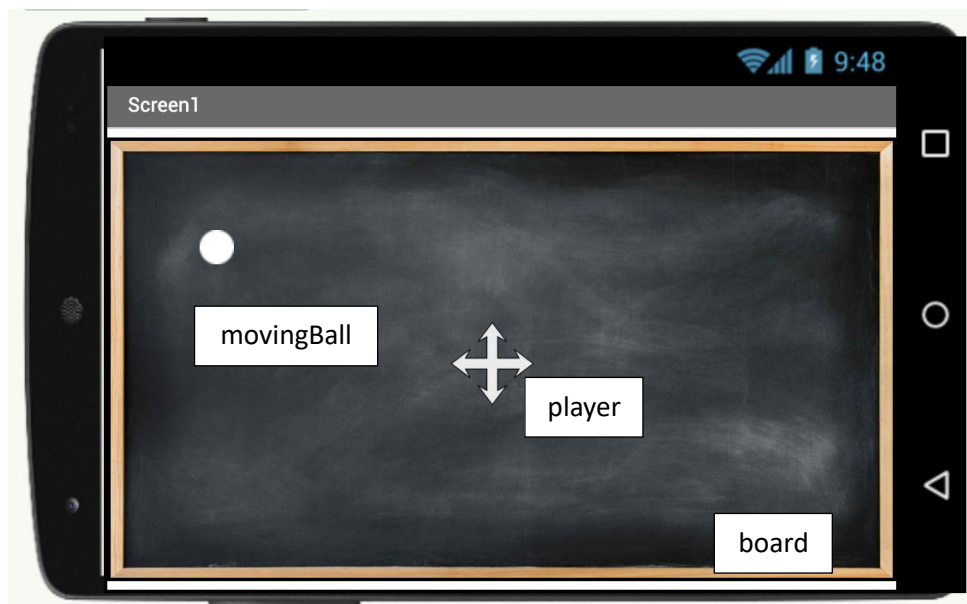

Figure 2

Task 3

(20 marks)

Figure 3 shows the interface of Task 3.

(a) **Download** “task3_2425.aia” from Teams and **import** it into MIT App Inventor 2.

(b) Add the following blocks:

When Clock "clock" is timer triggered

Call TeachableMachineImageClassifier "tmic" to classify video data.

(c) Add the following blocks:

When ImageSprite "basket" collides with ImageSprite "fruit",

Change the position of ImageSprite "fruit" to the top of the screen.

Increase the text of the Label "score" by 1.

(d) Add the following blocks:

When the ImageSprite "fruit" reaches the edge

Change the position of ImageSprite "fruit" to the top of the screen.

(e) Add the following blocks:

When the TeachableMachineImageClassifier "tmic" got classification

If the result value for "Left" is greater than "Right":

Change the heading of ImageSprite "basket" to move left.

Change the speed of ImageSprite "basket" to 10.

Else

Change the heading of ImageSprite "basket" to move right.

Change the speed of ImageSprite "basket" to 10.

(g) **Export** “task3_2425.aia” and **submit** it to Teams.
