

Carmel Holy Word Secondary School
2024-2025 Term 1
Secondary 3 Computer Literacy
Practical Mock
Time: 45 Minutes

Name	
Class	
Class no.	
Date	
Marks	/ 50

1. Write your Name, Class and Class Number in the boxes provided.
 2. Follow the instructions below to finish the examination tasks.
 3. **If you fail to upload your work, NO MARK will be given.**
-

1. **ALL TASKS** should be finished in **MIT App Inventor 2**.
2. Login to Teams and open a folder named “S3 Term 1 Practical Mock”.
3. Download the files “task1_2324.aia”, “task2_2324.aia” and “task3_2324.aia” to your computer.
4. Submit your work to the suitable assignments in Teams.

Task 1

(15 marks)

Figure 1 shows the interface of Task 1.

(a) **Download** “task1_2324.aia” from Teams and **import** it into MIT App Inventor 2.

(b) **Insert an ImageSprite** on the Canvas with the following properties:

- Name: “car”
- Width: 30px
- Height: 60px
- X: 180
- Y: 250
- Picture: “car.png”

(c) Add the following blocks:

When ImageSprite “car” is being **touched**,
Move ImageSprite “car” **upward by 10 pixels**.

(d) Add the following blocks:

When ImageSprite “car” **reached the edge**,
Move ImageSprite “car” to the **original position**.

(e) **Export** “task1_2324.aia” and **submit** it to Teams.

Figure 1

Task 2

(15 marks)

Figure 2 shows the interface of Task 2.

(a) **Download** “task2_2324.aia” from Teams and **import** it into MIT App Inventor 2.

(b) Add the following blocks:

When Screen1 is being **initialize**

Change the heading of Ball "whiteball" to **random integer** between 0 to 360.

Change the speed of Ball "whiteball" as 10.

(c) Add the following blocks:

When the Ball "whiteball" **reaches the edge**

Ball "whiteball" **bounces** with the edge.

(d) Add the following blocks:

When the Ball "whiteball" is being **touched**

Increase the text of the Label "score" by 1.

Change the heading of Ball "whiteball" to **random integer** between 0 to 360.

Increase the speed of Ball "whiteball" by 5.

(e) **Export** “task2_2324.aia” and **submit** it to Teams.

Figure 2

Task 3

(20 marks)

Figure 3 shows the interface of Task 3.

(a) **Download** “task3_2324.aia” from Teams and **import** it into MIT App Inventor 2.

(b) Add the following blocks:

When Clock "clock" is timer triggered

Call TeachableMachineImageClassifier "tmic" to classify video data.

(c) Add the following blocks:

When the ImageSprite "paddle" is collided with Ball "ball"

Change the heading of Ball "ball" to (0 - current heading of Ball "ball").

(d) Add the following blocks:

When the Ball "ball" reaches the edge

Ball "ball" bounces with the edge.

(e) Add the following blocks:

When the TeachableMachineImageClassifier "tmic" got classification

If the result value for "Left" is greater than "Right":

Change the heading of ImageSprite "paddle" to move left.

Change the speed of ImageSprite "paddle" to 10.

Else

Change the heading of ImageSprite "paddle" to move right.

Change the speed of ImageSprite "paddle" to 10.

(g) **Export** “task3_2324.aia” and **submit** it to Teams.
